SUMMARY

I am a third-year Information technology undergraduate at SLIIT with strong proficiency in full-stack web development and mobile app development. I have a strong command of both Sinhala and English and possess solid experience working with various programming languages and tools. I am highly computer literate, have a strong work ethic, and am passionate about continuous learning. I am currently seeking an internship to apply my knowledge in a real-world environment and further enhance my technical and professional skills in Information technology.

EDUCATION

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology

05/2023 - Present

GCE Advanced Level - Technology Stream (Feb 2022)

Rahula College - Matara

GCE Ordinary Level (Dec 2016)

Kokawela Central Collage - Matara

TECHNICAL SKILLS

Programming Languages: JavaScript , HTML , CSS , SQL , Java , PHP , Kotlin , XML

Frameworks & Libraries: React.js, Tailwind CSS , Node.js , Express.js , Bootstrap

Tools & Platforms: GitHub , VS Code , Figma , MongoDB , MySQL , Android Studio , Eclipse

PROJECTS

Hotel management System (University Project) [GitHub](#)

08/2025

Designed and developed a fully responsive H website for a freelance client, showcasing premium services like airport transfers, private tours, and car rentals. Delivered with smooth animations and SEO optimization to enhance user experience and boost online visibility.

Technologies: Next.js, Tailwind CSS, JavaScript, Vanilla.js , SEO

Vehicle Parts and Fuel Booking Platform (University Project) [GitHub](#)

08/2025

This platform is designed to simplify the process of purchasing vehicle parts online and booking fuel services for customers and service stations. Built using Java and MySQL, the application provides a user-friendly interface for users to seamlessly order vehicle parts and schedule fuel bookings, making it easier for service stations to manage and track orders.

Technologies: Java, MySQL

InExOp – Income and Expense Manager (University Project) [GitHub](#)

08/2025

InExOp is a lightweight financial tracker built using Kotlin and XML, designed to help users manage their daily income and expenses with ease.

Technologies: Kotlin, Xml, Android Studio

TimeTunner – Todo list, Time table, Calander (University Project) [GitHub](#)

08/2025

My Todo List is a simple app that lets you add, complete, and delete your daily tasks — keeping you organized and on track.

Technologies: Kotlin, Xml, Android Studio
