SUMMARY

Third-year Information Technology undergraduate at SLIIT with hands-on experience in full-stack web development and mobile app development. Proficient in JavaScript, React.js, Node.js, and Java, with practical exposure to building authentication systems, REST APIs, and database-driven applications. Fluent in both Sinhala and English.

EDUCATION

BSc (Hons) in Information Technology <i>Sri Lanka Institute of Information Technology (SLIIT)</i>	05/2023 - Present
GCE Advanced Level - Technology Stream <i>Rahula College, Matara</i>	February 2022
GCE Ordinary Level <i>Kokawela Central College, Matara</i>	December 2016

TECHNICAL SKILLS

Programming Languages: JavaScript, HTML, CSS, SQL, Java, PHP, Kotlin, XML

Frameworks & Libraries: React.js, Tailwind CSS, Node.js, Express.js, Bootstrap, Django

Tools & Platforms: GitHub, VS Code, Figma, MongoDB, MySQL, Android Studio, Eclipse

PROJECTS

Study Management System (University Project)

[GitHub Repository](#)

Technologies: React, Node.js, Express.js, Tailwind CSS, JavaScript, REST API, Playwright

- Built a full-stack study management platform with a Node.js/Express backend and a React (Vite) frontend, covering authentication, user management, session scheduling, quizzes, document handling, and an admin dashboard.
- Developed a companion browser extension to integrate the platform with the browser and surface contextual alerts.
- Implemented AI-assisted services for automated quiz generation and difficulty tracking.

Smart Campus Operation Hub (University Project)

[GitHub Repository](#)

Technologies: React, Tailwind CSS, JavaScript, Spring Boot, Playwright

- Designed and developed a full-stack enterprise platform to modernize university operations, including physical resource management, lab booking, support ticketing, and automated notifications.
- Built a centralized, secure system providing a unified experience for students, staff, and administrators.

Hotel Management System (University Project)

[GitHub Repository](#)

Technologies: React, Node.js, Tailwind CSS, JavaScript, Playwright

- Designed and developed a fully responsive website for a freelance client, showcasing services such as airport transfers, private tours, and car rentals.
- Implemented smooth UI animations and SEO optimization to improve user experience and online visibility.

Vehicle Parts and Fuel Booking Platform (University Project)

[GitHub Repository](#)

Technologies: Java, MySQL

- Built a platform to simplify online purchasing of vehicle parts and booking of fuel services for customers and service stations.
- Designed a user-friendly interface enabling seamless ordering and scheduling, and easier order tracking for service stations.

E-Commerce Platform (Self-study Project)

[GitHub Repository](#)

Technologies: Django, MySQL

- Built a platform to simplify online purchasing of multiple item categories for customers.
- Designed a user-friendly interface enabling seamless ordering and easier order tracking for users.

TimeTuner - Todo List, Time Table, Calendar (University Project)

[GitHub Repository](#)

Technologies: Kotlin, XML, Android Studio

- Developed an Android to-do list application that lets users add, complete, and delete daily tasks to stay organized.
